Wednesday:
7:30 P. M. Training Union Council meeting and Prayer Period.

Friday:
3:30 P. M. Intermediate G. A.'s.

The Brotherhood will meet at 7:30 P. M. this Saturday, the 5th.

The Homecoming Day services climaxed the 123th Anniversary Observance. There were 175 in the morning worship services, and 324 in the afternoon services. Numerous people returned for the day. The fellowship was wonderful, and the services were inspiring and challenging. Former pastors, the Rev. W. M. Thompson and Dr. V. W. Sears brought greetings and the morning message, and Dr. Carl A. Collins, and the Rev. J. Marshall Walker brought the afternoon messages. Prepared worship music was rendered by the four Liberty Baptist Church Choirs, Mr. Knapp, Mrs. Russell Gimbert, and Mr. and Mrs. David Goode.

Appomattox Methodist Circuit

Aaron D. Smith, Pastor
10 A. M. Hermon.
"Which Is Greater?"
11:15 A. M. Mt. Comfort.
"Today's Responsibility."

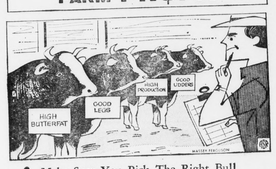
THE AMERICAN WAY

Simple Jig Saw Solution

FARM PROFIT



● Make Sure You Pick The Right Bull

Be a good "match-maker" when you pick a bull to mate with your dairy cows. The fastest way to improve a herd is to select a bull with the ability to correct the weak points of each cow. If you have a cow with a poor udder, match her with a bull that has the proven ability to sire daughters with good udders. A cow low in butterfat production should be mated with a bull whose daughters have a high percentage of butterfat.

Now that frozen semen techniques have been perfected, picking a bull is almost like visiting the supermarket. There's a wide selection available from most artificial breeding organizations.

From studies of several programs, Massey-Ferguson researchers point out that it pays a dairyman to take a little time to study cows in the herd for weak points and then make a careful selection of bulls. Good records are essential for this program—DHIA owner-sample or weigh-a-day-a-month will show which cows are making money.

Just because one particular bull has become popular doesn't mean that's the bull you should use on every cow in your herd. The qualities of that bull may not be what you need to insure that your heifers are better than their dams. Instead, use your records and those of your breeding association to select the best bull for each cow.

Artificial breeding organizations have much information available on their bulls—HIR and DHIA records, official type classification of the bull's daughters and photographs. If you tie these pieces of information together, you shouldn't have much trouble finding the right bull for any particular cow.

If you are using young bulls that haven't yet been proven, choose one from a family that has demonstrated the strength to overcome the weakness of a particular cow. Chances are the calves will grow up to be better producers and will last longer than the majority of the cows in your present herd.

DEATHS

JOHN T. SMITH

John Thomas Smith, 67, Appomattox farmer and sawmill operator, died early Tuesday of a heart attack while shaving. Born August 5, 1892, he was the son of Fields L. Smith and Anna Durrum Smith. He is survived by three brothers, Jasper A., Richard F. and Ernest W. Smith, all of Appomattox; and five sisters, Mrs. Mary Page, of Richmond; Mrs. Callie Flinchum, of Lynchburg; Mrs. Essie Williams, of Appomattox; Mrs. Nona Kittelsaa, of Reading, Pa.; and Mrs. Odell Newkirk, of Columbus, O.

Funeral services will be held at Robinson Funeral Home Thursday, at 11 A. M. with burial in the family cemetery.

Casualties

"Man who never saw a motor car," reads a news item. Hospitals, of course, are full of these. -Punch.

Colored Dots

An appreciative crowd attended the annual revival and home-coming at the First Baptist Church last Sunday. The pastor of the church delivered the morning sermon. The Rev. Freeman Johnson, of Lynchburg, Va., delivered the 3 P. M. sermon. Music was furnished by the home choir. Dinner was served by the ladies of the church. A grand total of $140.00 was reported during the day. The Rev. C. L. Brown is conducting the service for the week.

An overflow crowd attended the special service sponsored by Mrs. Essie Jones, a former member of the Peaceful Grove Baptist Church, now of the Canaan Baptist Church and his choir of Philadelphia, Pa. The service was rendered by the pastor of the Canaan Baptist Church and his choir and chorus. A bus of 41 members and several cars came from Philadelphia. A total of $205.50 was reported during the day. Dinner was served by the ladies of the church. The pastor of the home church, the Rev. R. A. Edwards, and the Rev. R. Q. Lawing assisted in the service.

The public is cordially invited to worship with the Galilee Baptist Church this Sunday morning at 10:30 and 11:30.

A successful revival was reported at the Promise Land Baptist Church. The Rev. Harold Carter, pastor of the Court Street Baptist Church, was the guest minister. Three additions were added to the church. The offering for the week was very good.

The first day of the new school year was very hopeful. A total of 351 elementary school children, and a total of 150 high school children registered the first day.

Mr. and Mrs. C. M. Harvey had for their guests on Sunday, August 50, Mr. and Mrs. Jessie Steele and Mrs. Youtha Jones and daughter, Eletta; Mr. and Mrs. John LeGrand and niece, Eleanor Grafford. Mrs. LeGrand's brother, Daniel Walker, and wife and three children, Odessa, Edith and J. Z., after visiting with the LeGrands, also came to visit Mrs. Harvey.

LOANS PLANS OFFERED

VIRGINIA POULTRYMEN

...ed new poultry house plans, ...ade for Virginia conditions, ...re available through county ...agents.

...Kite agricultural engineer ...says the new plans include ...ge-type broiler houses, ...ge layer houses.

...ates that programs for in... and broiler production ...have resulted in in... in improved houses ...ease for poultry.

...atures during the ...ased lower feed effi... a drop in egg produc...tion in many areas. So poultrymen are taking a second look at the conditions of their present buildings, and are reconsidering the features of new buildings being planned.

Kite says that improperly constructed houses can cause trouble with too-high or too-low temperatures, rapid inside temperature changes, wet litter and drafts. The unfavorable conditions can offset some of the advantages of improved breeding and feeding.

To provide the most suitable house for layers or broilers, it is necessary to consider the chicken's needs, and the facilities that will most nearly meet those needs. The new VPI pole-type brooer and laying house plans were designed on this basis.

Health and Beauty

Listening to a group of ladies talking, the writer is impressed that one of the most absorbing topics of conversation is cooking recipes. Most of the interest centered around desserts and that foods that are mixed with and combined with condiments to make them taste good.

Civilized races have gotten so far away from the simple food provided by nature, that it is no longer palatable to them, unless seasoned with condiments. Probably no race of people in the world suffers so much from constipation, colitis and intestinal disorders as the Americans.

In our own country, malnutrition is evident among the rich as well as the poor. There is no state in which there is any excuse for this. Vegetables of every kind, as well as many fruits, will grow if planted and given reasonable care. Every little farm should provide milk and eggs in abundance for the needs of the family.

Instruction in the care of the body must begin in the schools and homes of the nation if our people are to be healthy.

The prospective mother should be instructed how to eat properly, in order to put the right material into the teeth of their unborn children. Calcium or lime enters largely into the formation of sound teeth. She should eat fresh leafy vegetables, beans, fruit, milk, etc.

The diet should be rich in lime and phosphorus. Only in this way will the child form sound teeth.

The baby should have milk; at first breast milk is best; fruit juices and cod liver oil with plenty of sunshine. If this regimen were carried out, the expensive dental clinics could probably be dispensed with in a few years.

The average child goes to school after a breakfast of hot biscuits (white), a piece of bacon, and a cup of coffee if he want sit. The families who can afford that sort of diet could provide milk instead of coffee, whole wheat instead of white flour. Eggs could be substituted for bacon every day or two. Some butter sould be served also.

A supper of fruit, milk, whole wheat bread, or oatmeal would spell the difference between undernourished, sick children, and healthy ones.

Play safe — drive carefully.

Mighty good man to know,
during... or after... business hours

KEEPING PROGRESS ON THE MOVE . . . that's the job of your Norfolk and Western agent. Each day the papers that cross his desk show a cross-section of life in your community. Here's a carload of coal for the power plant . . . local pulpwood consigned to a paper mill. Here are lacquers and waxes for the furniture factory . . . and finished furniture consigned to dealers across the nation. Here's fertilizer for Farmer Jones . . . and Farmer Jones' grain bound for overseas through the modern Port of Norfolk on famed Hampton Roads. The movement of goods is the lifeblood of business, and you might call its heart the local railroad agent.

THE SPIRIT OF SERVICE
Because a railroad has only service to sell, your local agent is pledged to the spirit of service. And this is reflected in his activity after hours. Many N&W agents are leaders in civic affairs . . . are good churchmen and good citizens . . . are helping to make their communities better places in which to live and work. Your N&W agent is a good man to know *after* business hours, too.

PART OF A POWERFUL TEAM
He's backed by fellow railroaders who know how to run a modern railroad . . . a railroad that's dependable in delivery . . . progressive and farsighted in its outlook. At his service are the nation's newest and most modern fleet of diesel locomotives . . . more freight cars per mile of line than any U. S. railroad 250 miles or more in length . . . new communications systems . . . roadbed and track and terminals second to none . . . vigorous sales and promotional activities designed to bring new industries to the communities served by the Norfolk and Western.

Your local N&W agent always welcomes an opportunity to be of service. You'll find him a mighty good man to know!

Norfolk and Western Railway

PAYING ITS OWN WAY . . . ALL THE WAY . . . ALL THE TIME
